

SELF PHOTOGRAPHING CAMERA SYSTEM

ABSTRACT OF THE DISCLOSURE

This invention accomplishes these and other objectives with a self-photographing camera system having a camera (1) on a swivel base (2, 7, 23) with
5 an electronic receiver (4, 26, 32) for receiving camera-directional input from an electronic transmitter (5, 27, 33) that is positioned on a photograph subject (6) that includes a potentially moving person or object. The electronic receiver is programmable to swivel the camera continuously in a direction that the electronic transmitter is positioned. Swivel direction can be universally horizontal and
10 vertical or optionally horizontal. A wide selection of camera controls by a photograph subject can be included.
